DETAILED ACTION

Status of Claims

Claims 1-5 and 7-10 are cancelled and Claim 6 is currently amended.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 30 July 2008 has been entered.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Grant et al (US 3,015,558), as further evidenced by "Material Hardness," in view of Karlstrom.

Grant et al, as further evidenced by "Material Hardness," in view of Karlstrom is applied as described in the office action mailed 31 January 2008. Regarding the phases as claimed, Grant et al teaches gamma prime phase of Ni₃Al, nickel gamma phase and cobalt alpha phase (column 9, lines 49-67). The limitation of the mirror-finished surface formed by final polishing is a property that would be met by the composition taught by Grant et al, as further evidenced by

“Material Hardness,” in view of Karlstrom. If the prior art teaches the identical chemical structure, the properties applicant discloses and/or claims are necessarily present. See MPEP § 2112.01.

Response to Arguments

Applicant's arguments filed 30 July 2008 have been fully considered but they are not persuasive. Applicant does not claim a how the impurity level obtained to read over the prior art teaching that this impurity range exists.
